## Safety Data Sheet

Chemical Substances and Company Information

Product name (Glass types)	be) S-LAH52			
Name of manufacturer	Ohara Incorporated			
Address	15-30 Oyama,1-Chome, Chuo-ku, Sagami	ihara-shi, Kanagawa 252-52	286, Japan	
Issuing Department	Environmental Safety Section, General Af	fairs Department	TEL:042-772-5118	FAX:042-774-1071
Executing Department	Material Production Control Section, Optic	cal Material Business Unit	TEL:042-772-5115	FAX:042-774-2314
Date of creation	Nov 26, 2014 Date	e of revision		

Hazards Identification

Optical glasses are physically and chemically stable and are not hazardous. However, the following danger hazardousness is concerned during processing of optical glasses.

Hazards

When dust inhales during dry processing and melting, may cause chronic or cumulative health impairment. And gas inhales during melting, may cause acute poisoning and chronic or cumulative health impairment including cancer.

Environmental effects

:

:

Pay attention to the concentrations of discharge density of gas during melting as they may damage the ecosystem.

Note 1: Weight percentages of relevant substances are listed in accordance with the Chemical Management Promotion Law(Japan)

First Aid N	leasures		
	Eye contact		f the grinding or polishing liquids come into contact with eyes, immediately rinse the eyes with clean water and obtain a medical diagnosis, if necessary. In the case of contact with dust from dry processing, be careful to avoid damaging the eyeballs and obtain a medical diagnosis.
	Mouth contact		f grinding and polishing liquids and dust enter the mouth, rinse with plenty of water. If ngestion occurs, give the patient plenty of water and induce vomiting, then obtain a medical diagnosis, if necessary.
Fire-Fighti	ng Measures		
	Since optical glasses	are	nonflammable, any extinguishing media may be used.
Spillage C	ountermeasures		
	Grinding and polishing liq	uids	Stop the flow with sandbags or the like to prevent the spill from contaminating soil or being absorbed into wastewater systems such as sewers. Collect as much of the released liquid as possible into an empty container.

Handling and Storage

Since optical glasses are physically and chemically stable, no precautions are required in handling and storage. During grinding, polishing, and dry processing

- \* When handling, be careful to prevent grinding and polishing liquids, grinding and polishing waste, and dust from dry processing from escaping and contaminating the environment; and
- \* Gargle and wash hands thoroughly after work.

Exposure Control / Personal Protection

Although there is no potential hazard in exposure to optical glass due to its physical and chemical stability, exposure to the mist scattered during wet processing and the scattered dust created during dry processing may result in injury. During wet processing : Prevent mist from scattering by providing the processing machine with a protective cover or the

sing : Prevent mist from scattering by providing the processing machine with a protective cover or the like.

During dry processing

: Prevent dust from scattering by installing a local exhaust system or the like.Wear a dust mask. Wear eye protection, if necessary.

as sewers, and collect as much of the released dust as possible into an empty container.

Be sure to remain upwind and wear a dust mask when dealing with dust spills.

Control concentrations of chemical substances

Chemical substance name	Dust
Control concentration	E=3.0 mg/m <sup>3</sup>

Physical and Chemical Properties

Physical state	:	Solid
Color	:	Pale yellow, transparent or colorless and transparer
Odor	:	Odorless
рН	:	Not applicable
Temperature of changing physical state (Yield point)	:	636°C
Specific gravity	:	4.41
Solubility	:	Low

Stability and Reactivity

Stability	:	Stable
Reactivity	:	Normally unobservable
Decomposition products	:	Normally unpredictable

**Toxicological Information** 

Since optical glasses	are phys	sically and chemically stable, they do not have acute toxicity or local effects.
Grinding and polishin	g liquids	and grinding and polishing waste and dust have:
Acute toxicity	:	No information
Carcinogenicity	:	No information
Chronic toxicity	:	Cumulative chronic toxicity through inhalation and skin contact

**Ecological Information** 

Since optical glasses are physically and chemically stable, they have no ecological effects. Gas generated during melting does not have hazardousness to the ozone layer. When concentrations of grinding and polishing liquids surpass the standard value of the Water Pollution Control Law(Japan) shown below, they have cumulative chronic toxicity.

Restricted substance	Zinc and its compounds
Effluent standards or permissible concentration	5 mg/L

**Disposal Considerations** 

Commission disposal to approved and licensed waste disposers in accordance with the relevant laws and regulations concerning the disposal and handing of wastes.

## **Transport Information**

None
