Safety Data Sheet

Chemical Substances and Company Information

Product name (Glass ty	pe) S-LAH71			
Name of manufacturer	Ohara Incorporated			
Address	15-30 Oyama,1-Chome, Chuo-ku, Sag	gamihara-shi, Kanagawa 252-5	286, Japan	
Issuing Department	Environmental Safety Section, Generation	al Affairs Department	TEL:042-772-5118	FAX:042-774-1071
Executing Department	Material Production Control Section, 0	Optical Material Business Unit	TEL:042-772-5115	FAX:042-774-2314
Date of creation	Nov 25, 2014	Date of revision		

Hazards Identification

Optical glasses are physically and chemically stable and are not hazardous. However, the following danger hazardousness is concerned during processing of optical glasses.

Hazards

:

:

When dust inhales during dry processing and melting, may cause chronic or cumulative health impairment. And gas inhales during melting, may cause acute poisoning and chronic or cumulative health impairment including cancer.

Environmental effects

Pay attention to the concentrations of discharge density of gas during melting as they may damage the ecosystem. BaO Т

First Aid	Measures		
	Eye contact :	clear	e grinding or polishing liquids come into contact with eyes, immediately rinse the eyes with n water and obtain a medical diagnosis, if necessary. In the case of contact with dust from processing, be careful to avoid damaging the eyeballs and obtain a medical diagnosis.
	Mouth contact :	inges	nding and polishing liquids and dust enter the mouth, rinse with plenty of water. If stion occurs, give the patient plenty of water and induce vomiting, then obtain a medical nosis, if necessary.
Fire-Figh	ting Measures		
	Since optical glasses are	e nonf	lammable, any extinguishing media may be used.
Spillage (Countermeasures		
	Grinding and polishing liquids	:	Stop the flow with sandbags or the like to prevent the spill from contaminating soil or being absorbed into wastewater systems such as sewers. Collect as much of the released liquid as possible into an empty container.
	Dust	:	Prevent dust from contaminating soil or being absorbed into wastewater systems such as sewers, and collect as much of the released dust as possible into an empty container. Be sure to remain upwind and wear a dust mask when dealing with dust

Handling and Storage

Since optical glasses are physically and chemically stable, no precautions are required in handling and storage. During grinding, polishing, and dry processing

- * When handling, be careful to prevent grinding and polishing liquids, grinding and polishing waste, and dust from dry processing from escaping and contaminating the environment; and
- * Gargle and wash hands thoroughly after work.

Exposure Control / Personal Protection

Although there is no potential hazard in exposure to optical glass due to its physical and chemical stability, exposure to the mist scattered during wet processing and the scattered dust created during dry processing may result in injury. During wet processing : Prevent mist from scattering by providing the processing machine with a protective cover or

- the like.
- During dry processing : Prevent dust from scattering by installing a local exhaust system or the like.Wear a dust mask. Wear eye protection, if necessary.

Control concentrations of chemical substances

Chemical substance name	Dust
Control concentration	E=3.0 mg/m ³

Physical and Chemical Properties

Physical state	:	Solid
Color	:	Pale yellow, transparent or colorless and transparen
Odor	:	Odorless
рН	:	Not applicable
Temperature of changing physical state (Yield point)	:	752°C
Specific gravity	:	4.36
Solubility	:	Low

Stability and Reactivity

Stability	:	Stable
Reactivity	:	Normally unobservable
Decomposition products	:	Normally unpredictable

Toxicological Information

Since optical glasses a	Since optical glasses are physically and chemically stable, they do not have acute toxicity or local effects.					
Grinding and polishing	Grinding and polishing liquids and grinding and polishing waste and dust have:					
Acute toxicity	:	No information				
Carcinogenicity	:	No information				
Chronic toxicity	:	Cumulative chronic toxicity through inhalation and skin contact				

Ecological Information

Since optical glasses are physically and chemically stable, they have no ecological effects. Gas generated during melting does not have hazardousness to the ozone layer.

Disposal Considerations

Commission disposal to approved and licensed waste disposers in accordance with the relevant laws and regulations concerning the disposal and handing of wastes.

Transport Information

None

Regulatory Information(Japan)

Industrial Safety and Health Law, enforcement ordinance of the same, bylaw of the same Pneumoconiosis Law, enforcement regulations of the same Ordinance on the Prevention of Dust Hazard Ordinance on the Prevention of Lead Poisoning Ordinance on the Prevention of Hazards due to Specified Chemical Substances Working Environment Measurement Law, enforcement ordinance of the same, enforcement bylaw of the same, standard of the same, standards for working environment evaluation Water Pollution Control Law, enforcement ordinance of the same, enforcement bylaw of the same, prefecture and ministry ordinances, notifications, and the like stipulating effluent standards **Chemical Management Promotion Law** Soil Contamination Countermeasures Act, enforcement ordinance of the same, enforcement regulations of the same. Poisonous and Deleterious Substances Control Act, enforcement ordinance of the same, enforcement regulations of the same. Waste Disposal and Public Cleansing Law, enforcement ordinance of the same, enforcement bylaw of the same •Please confirm applicability of laws and regulations depending upon the site scale, installed capacity, and the like. •Make sure you are aware of and adhere to all applicable local regulations.

Other Information

Contact us if you wish to melt down glass for recycling or other purposes.
