Safety Data Sheet

Chemical Substances and Company Information

Product name (Glass type) S-TIH14 Name of manufacturer Ohara Incorporated

Address 15-30 Oyama,1-Chome, Chuo-ku, Sagamihara-shi, Kanagawa 252-5286, Japan

Issuing Department Environmental Safety Section , General Affairs Department TEL:042-772-5118 FAX:042-774-1071 Executing Department Material Production Control Section , Optical Material Business Unit TEL:042-772-5115 FAX:042-774-2314

Date of creation Sep 19, 2014 Date of revision

Hazards Identification

Optical glasses are physically and chemically stable and are not hazardous. However, the following danger hazardousness is concerned during processing of optical glasses.

Hazards : When dust inhales during dry processing and melting, may cause chronic or cumulative health

impairment. And gas inhales during melting, may cause acute poisoning and chronic or

cumulative health impairment including cancer.

Environmental : Pay attention to the concentrations of discharge density of gas during melting as they may

effects damage the ecosystem.

Note 1: Weight percentages of relevant substances are listed in accordance with the Chemical Management Promotion Law(Japan)

First Aid Measures

Eye contact : If the grinding or polishing liquids come into contact with eyes, immediately rinse the eyes with

clean water and obtain a medical diagnosis, if necessary. In the case of contact with dust from dry processing, be careful to avoid damaging the eyeballs and obtain a medical diagnosis.

Mouth contact : If grinding and polishing liquids and dust enter the mouth, rinse with plenty of water. If

ingestion occurs, give the patient plenty of water and induce vomiting, then obtain a medical

diagnosis, if necessary.

Fire-Fighting Measures

Since optical glasses are nonflammable, any extinguishing media may be used.

Spillage Countermeasures

Grinding and polishing liquids : Stop the flow with sandbags or the like to prevent the spill from contaminating soil or

being absorbed into wastewater systems such as sewers. Collect as much of the

released liquid as possible into an empty container.

Dust : Prevent dust from contaminating soil or being absorbed into wastewater systems such

as sewers, and collect as much of the released dust as possible into an empty container. Be sure to remain upwind and wear a dust mask when dealing with dust

spills.

Handling and Storage

Since optical glasses are physically and chemically stable, no precautions are required in handling and storage. During grinding, polishing, and dry processing

- * When handling, be careful to prevent grinding and polishing liquids, grinding and polishing waste, and dust from dry processing from escaping and contaminating the environment; and
- * Gargle and wash hands thoroughly after work.

Exposure Control / Personal Protection

Although there is no potential hazard in exposure to optical glass due to its physical and chemical stability, exposure to the mist scattered during wet processing and the scattered dust created during dry processing may result in injury.

During wet processing : Prevent mist from scattering by providing the processing machine with a protective cover or

the like

During dry processing : Prevent dust from scattering by installing a local exhaust system or the like. Wear a dust mask.

Wear eye protection, if necessary.

Control concentrations of chemical substances

Chemical substance name	Dust		
Control concentration	E=3.0 mg/m ³		

Reference number: 0065-S -00

Physical and Chemical Properties

Physical state : Solid

Color : Pale yellow, transparent or colorless and transparent

Odor : Odorless pH : Not applicable

Temperature of changing physical state (Yield point) : 634°C Specific gravity : 3.17 Solubility : Low

Stability and Reactivity

Stability : Stable

Reactivity : Normally unobservable Decomposition products : Normally unpredictable

Toxicological Information

Since optical glasses are physically and chemically stable, they do not have acute toxicity or local effects.

Grinding and polishing liquids and grinding and polishing waste and dust have:

Acute toxicity : No information Carcinogenicity : No information

Chronic toxicity : Cumulative chronic toxicity through inhalation and skin contact

Ecological Information

Since optical glasses are physically and chemically stable, they have no ecological effects.

Gas generated during melting does not have hazardousness to the ozone layer.

Disposal Considerations

Commission disposal to approved and licensed waste disposers in accordance with the relevant laws and regulations concerning the disposal and handing of wastes.

Transport Information

None
